- removable stainless steel blades
 - power: 800W
- vibration reduction system
 - 3-year warranty on motor
- EAN model GBL-750: 5904730198479

Just like with the GBL-800 model, this blender offers the full possibilities of microprocessor control, supported with a legible LCD panel. The stable base is crowned with a glass jug that may be easily washed in a dishwasher. The high-powered motor used in the unit, combined with the vibration reduction system, makes this model one of the most silent appliances in its class. Crush ice, make a cocktail or a drink by selecting one of the available programmes or mix the products with manual settings.
