The GOTIE electric blanket with the multi-purpose programming unit and the LED display is an excellent solution for persons suffering from rheumatic illnesses. It is made of soft polar and features attractive colours and design. It may be washed after disconnection of the power cord. It is provided with regulation of operation time from 1 to 10 hours. The automatic breaker switch ensures safety of use. The THERMO-CARE function allows heating at the highest temperature for the maximum of 60 minutes in the automatic mode.
