 - EAN model GSJ-500S: 5904730198011
 - EAN model GSJ-500G: 5904730198004
- EAN separate item GSJ-A500: 5904730198578
 - EAN top for juicing apples GSJ-B500: 5904730198424

The GSJ-500 slow-speed juicer is a professional unit used for extracting juice from most of vegetables and fruits. The unique-design auger is running at 80 rotations per minute. The high 400W power rating helps the juicer handle most of vegetables and fruits, retaining their nutrient value when pressed slowly. The motor of the appliance has a number of safeguards, resulting in a 5-year manufacturer's guarantee. Precision of detailing and high-class design add to the advantages of the appliance. Our offer includes also a paste-type strainer, available as an accessory item (code GSJ-A500) and the top for juicing apples (code GSJ-B500).
