The first as advanced slow juicer with unprecedented functionality and microprocessor technology. A slim device body is purchasable in four universal colours suitable for every interior design. Electronic panel with soft-touch buttons and intuitive icons facilitate the choice of one of nine available programs. The big inlet simplifies juicing. By choosing one of two different strainers you can prepare clear juice or a paste. In addition, this slow juicer can be upgraded with a special shredder attachment for making vegetable and fruit salads. You can buy the attachment as a separate accessory.
