

# GSJ-800

## SLOW JUICER

- BPA free - components without bisphenol A
- microprocessor control
- operation time indicator
- 4 work modes
- 3 speeds suitable for different types of fruits and vegetables
- motor speeds: 20/30/40rpm
- cleaning function
- legible LCD display
- power: 150W DC motor
- two settings – on and reverse
- overheat protection
- noiseless operation
- stainless steel strainer
- extra stainless steel strainer for paste
- includes juice and pulp containers
- anti-drip protection
- transparent inlet
- ergonomic pusher
- 3-year warranty on motor
- EAN model GSJ-800A: 5904730198400
- EAN model GSJ-800W: 5 904730198417
- EAN separate item GSJ-A400: 5904730198516

GSJ-800 is the first slow juicer available in the market in the designing of which the latest technical solutions have been employed. What is unique in it is the possibility of adjusting rotational speed to products of different hardness. Four modes of operation are available, easily selectable with a large and legible LCD display. A microprocessor takes care of the motor, gradually increasing or reducing rotation speed. The appliance is controlled with one, ergonomic knob executed in the soft-touch technology. The set includes two strainers: regular and paste-type, with large openings, available also as a separate item (code GSJ-A400).
